17 years of extensive Occupational Safety experience, worked with more than 20 brands

MASTERPATH SDN BHD
LEARN. GROW. MASTER.

COURSE OVERVIEW

In this training, participants will gain a comprehensive understanding of the key principles and best practices for the safe management of hazardous chemicals in the workplace. The course will cover critical topics such as the types and classifications of hazardous chemicals, the significance of Safety Data Sheets (SDS), and relevant regulatory requirements. Participants will also learn about the correct use of Personal Protective Equipment (PPE) and appropriate response procedures in the event of chemical spills or exposure incidents.

LEARNING OUTCOMES

- Identify various types and classifications of hazardous chemicals and understand the associated health, safety, and environmental risks.
- Apply safe handling and storage practices for hazardous chemicals in the workplace.
- Properly select and use appropriate Personal Protective Equipment (PPE).
- Respond effectively to chemical spills or exposure incidents by following established emergency procedures.

COURSE CONTENT

- INTRODUCTION TO OSHA AMENDMENT 2022 & HAZARDOUS CHEMICALS
- HEALTH AND ENVIRONMENTAL HAZARDS
- SAFE HANDLING PROCEDURES
- SAFETY DATA SHEET
- RISK ASSESSMENT AND SAFE WORK PRACTICES
