MASTERPATH SDN BHD
LEARN. GROW. MASTER.

COURSE OVERVIEW

This 2 day forklift training provides comprehensive instruction on safe and efficient forklift operation, covering both manual and mechanical handling. It enhances safety, productivity, and compliance with the Occupational Safety & Health Act. Designed for both new and experienced operators, the course combines theoretical and practical training to develop essential skills in forklift operation, safety management, and equipment handling.

LEARNING OUTCOMES

- Understand the key safety requirements and legal obligations under the Occupational Safety & Health Act for forklift operations.
- Identify the components, functions, and operating principles of different types of forklifts.
- Apply safe operating practices for manual and mechanical forklift handling to prevent accidents and equipment damage.
- Demonstrate proper load handling, stacking, and maneuvering techniques in various workplace conditions.
- Perform basic forklift inspection, maintenance checks, and safety management procedures to ensure reliable operation.

COURSE CONTENT

- FORKLIFT SAFETY REGULATIONS & LEGAL COMPLIANCE
- FORKLIFT TYPES, COMPONENTS & FUNCTIONS
- HAZARD AWARENESS & RISK CONTROL
- PRE-OPERATIONAL INSPECTION & MAINTENANCE
- OPERATING TECHNIQUES & LOAD HANDLING
- WORKPLACE SAFETY & TRAFFIC MANAGEMENT
